Journal of Geochemical Exploration, Volume 61, Nos. 1–3

Special Issue

Selective Extractions

Edited by

GWENDY E.M. HALL

and

GRAEME F. BONHAM-CARTER

Geological Survey of Canada, 601 Booth Street, Ottawa, Ont. K1A0E8, Canada

CONTENTS

Foreword vii

Analytical perspective on trace element species of interest in exploration
G.E.M. Hall 1

Readsorption of gold during selective extraction — observations and potential solutions
D.J. Gray, M.J. Lintern and G.D. Longman 21

Leaching of mobile forms of metals in overburden: development and application
W. Xueqiu 39

Electrogeochemical sampling with NEOCHIM — results of tests over buried gold deposits
R.W. Leinz, D.B. Hoover, D.L. Fey, D.B. Smith and T. Patterson 57

Application of the mobile metal ion technique to routine geochemical exploration
A.W. Mann, R.D. Birrell, A.T. Mann, D.B. Humphreys and J.L. Perdrix 87

Enzyme leach anomalies associated with deep Mississippi Valley-type zinc ore bodies at the Elmwood Mine, Tennessee
J.R. Yeager, J.R. Clark, W. Mitchell and R. Renshaw 103

A comparative analysis of enzyme leach and mobile metal ion selective extractions; case studies from glaciated terrain, northern Ontario
A.F. Bajc 113

A new theory to explain the formation of soil geochemical responses over deeply covered gold mineralization in arid environments
B.W. Smee 149

A comparison of selective extraction soil geochemistry and biogeochemistry in the Cobar area, New South Wales
D.R. Cohen, X.C. Shen, A.C. Dunlop and N.F. Rutherford 173

Vertical migration of elements from mineral deposits
I.S. Goldberg 191

Application of selective extraction techniques in metal-bearing phases identification: a South European case study
E. Cardoso Fonseca and E. Ferreira da Silva 203

Dissolution rates of metals in Fe oxides: implications for sampling ferruginous materials with significant relict Fe oxides
J. Xie and A.C. Dunlop 213
